

## The Young Bloods Gang

**Harry** is 9 and he has severe haemophilia A. He loves football and curry and doesn't like going to the hospital when he has a bleed.

**Karen** is Harry's sister - she is 11 and sometimes her brothers are a pain! Karen is a carrier of haemophilia and she has some symptoms too. She loves horses and eating chocolate.

**Stan** is Harry and Karen's little brother. He is 7 and he doesn't have haemophilia. He sometimes gets bored going to the hospital with Harry but he loves playing football together. He likes computer games and pizza.

This is **Wendy**, she's Harry's friend from the haemophilia centre. She has von Willebrand's and is 12. Wendy loves pop music and would like to be journalist one day. She likes living with her mum, step-dad, and step-brother.

**Jasmine** is 10 and she goes to the centre too because she has Factor VII deficiency - it's quite rare. She wishes her parents wouldn't worry so much when she does games at school. She likes basketball and eating pizza.

**Jake** is 6 and a half, he has haemophilia B. Jake has an inhibitor so he has been having a lot of treatment recently, but he still loves swimming and eating ice-cream. Jake lives with his mum and grandma -his uncle has haemophilia too so he helps Jake with the treatment.

**Kris** is 8 and has a platelet disorder called storage pool disorder. It means he can bruise a lot. He loves playing the guitar and wants to be in a band when he grows up.
